To whom it may concern:

Ron Saikowski has been a valuable team member of many architectural / engineering projects over a 20 year period. His knowledge, insight, options and choice evaluation, and solution-oriented approach, have been integral to the successful development and implementation of project site layouts, site infrastructure and utilities connectivity. In addition, he has been able to provide all-in-one integrated building systems engineering, which has enabled faster and more coordinated services. Above all, Ron offers us, and our clients, value-added information and knowledge due to his wide range of connections in the community. All done with professional courtesy and delivery, open-mindedness, team-spirit approach, service follow-through, and a sense of humor. A very valuable project team member, and a pleasure to work with and know! Thank you Ron!
